

## **Scribble Swap**

### **How does it help students?**

- Allows students to work collaboratively while still giving them the freedom to be as creative as they want

### **What will we need?**

- Piece of paper
- Pencil or pen
- Other coloring materials (crayons, markers, colored pencils)

### **How do we do it?**

- Everyone draws a quick scribble on their own piece of paper
- Swap papers with someone else
- Develop the scribble you received into a picture

### **Additional Notes:**

- Don't let the students know what they will be doing with the scribble in advance, that could alter the process
